

## VSO Breeders' List

The breeders on this list have attested that they have done / will do the following health tests and obtained / will obtain certified clearances on their breeding stock before breeding:

- hip radiograph evaluations for hip dysplasia by board-certified veterinarians (SM & WH)
- eye clearances by board-certified veterinary ophthalmologists (SM & WH)
- thyroid testing (SM only)

They also attest to provide a written contract with a health guarantee, lifetime support, and a requirement that puppies be returned to them or that they approve a new home. In addition, their puppies are registered with the Canadian Kennel Club if they reside in Canada, or the American Kennel Club if they reside in the US.

**It still remains the responsibility of the buyer to research each breeder fully before finalizing the purchase of a puppy.** The VSO has various resources at <https://www.vsovizsla.org/find-a-breeder> to guide you.
